

Cytology Study Day

Friday 3 December 2010 5 CPD Credits

Programme organised by Dr Ash Chandra and Dr Mina Desai

To be held at The Royal College of Pathologists, 2 Carlton House Terrace, London, SW1Y 5AF

This study day brings back the ever popular annual cytology programme hosted by the College. The emphasis of the two symposia will be on new trends and possible future directions as well as on revisiting older practices. In the morning symposium on breast disease, there will be MDM style, case-based presentations on diagnostic problems with questions and discussion after each case or at the end of each talk. The afternoon will be dedicated to the advances in cervical screening based on recent trials and will focus on what may happen next in the UK. The study day will be suitable for all practising cytopathologists and histopathologists and also those involved in running laboratories and who might be involved in pathology modernisation projects.

0900 Registration

Diagnosis of breast disease – revisiting the role of cytology (Chair, Prof Sarah Pinder, London)

0930 Diagnostic challenges in breast FNA cytology - **Prof Rana Hoda**, New York
