

**Endometrial lesions in cervical samples - Practical Microscopy Workshop.  
Mr Nick Dudding, Sheffield and Mr David Smith, London.**

"A 90 minute workshop dedicated entirely to the cytology of endometrial lesions in liquid based cervical cytology samples. The workshop will include both Thinprep and Surepath samples and will give participants the opportunity to see an extensive collection of endometrial lesions including; Endometrioid cancers, serous cancers, carcinosarcoma and adenocanthoma alongside cases of ovarian carcinoma, examples of psammona bodies and many examples of benign mimics such as IUD change.

In addition to teaching cases there will be a small self assessment element with number of unknown cases that will be discussed by the tutors at the end of the session."
